

Animal A to Z

What will I need?

- Paper
- Colouring pencils or pens

*Why not...
Make a game of it? Naming animals
out loud, how far through the alphabet
can you get in 60 seconds?*

What do I do?

1. Divide your paper so that it has 5 columns and 5 rows. That will create 25 boxes. As there are 26 letters in the alphabet, you can create one extra space by dividing the last box in two.
2. Now it's time to test yourself. Can you think of an animal for every letter? Perhaps you've seen some on display at Ipswich Museum or the Natural History Museum in Colchester? Don't worry if you can't think of one. Why not search online or take a look at our example:
